LinkedIn: Suhaila Binte Akbar Ali

EDUCATION

Diploma in Applied AI & Analytics (DAAA)
Nanyang Polytechnic, Singapore | 2025–2028

GCE O-Level and N-Level
St. Margaret's Secondary School, Singapore | 2020–2024

SKILLS

Programming & Development: Python, Java, JavaScript, Data Structures & Algorithms, Full-Stack Development, Frontend Development, Backend Development
Web Development: Flask, React, Node.js/Express, HTML, CSS, Bootstrap, Jinja2, REST APIs
Data Analytics & AI: SAS Viya, SAS Visual Analytics, SAS Model Studio, KNIME, NumPy, Pandas, Jupyter Notebook, Anaconda,Power BI
Database: SQLite, PostgreSQL, SQL, MySQL Workbench
Development & Design Tools: Git, GitHub, Visual Studio Code, Figma, Canva, Adobe Photoshop
Other: Data Cleaning, Data Wrangling, Predictive Modelling, Data Visualisation, UI/UX

CERTIFICATIONS

- AI Fluency: Framework & Foundations — Anthropic
- AI FOR INDUSTRY® LITERACY IN AI — AI Singapore
- KNIME Certification: L1 Examination — KNIME
- Web Development Fundamentals — IBM
- User Experience Design Fundamentals — IBM

KEY STRENGTHS

• Problem-solving
• Teamwork and collaboration
• Communication
• Attention to detail
• Time management
• Willingness to learn
• Content creation and presentation

SUMMARY

Year 2 Diploma in Applied AI & Analytics (DAAA) student at Nanyang Polytechnic with hands-on experience in software development, data analytics, database design, UI/UX and digital content creation. Experienced in developing practical solutions through individual and team projects, with a focus on problem-solving, attention to detail and user-centred design. A curious and adaptable learner who enjoys exploring new technologies and applying technical and creative skills to real-world projects.

PROJECTS

EFAR Payroll Automation System

Group Project — NYP SCCCI AI Challenge | React (Vite), Node.js/Express, PostgreSQL, Docker

- Contributed to a full-stack payroll automation system covering roster synchronisation, validation, calculation, approval and payment. Independently designed and developed the Payroll Approval Module (UC-004) for manager review and approval decisions.
- Implemented server-side validation for mandatory rejection comments, duplicate approval prevention and blocking approval when calculations were incomplete. Developed RESTful API endpoints, audit-logged approval history and unit tests for core business logic.

WhatsUp App — WhatsApp FAQ Knowledge Base Management System

Group Project | Python, Flask, SQLite, HTML, CSS, Bootstrap, Jinja2

- Developed the FAQ Knowledge Base Management component for a web application supporting repetitive WhatsApp sales enquiries.
- Implemented FAQ creation,editing and deletion; developed FAQ List and Category Workspace features with search/filtering. Designed an analytics dashboard with KPI cards and connected frontend interfaces with backend routes and database operations.

Predictive Analysis of Gym Member Calorie Expenditure

Predictive Analysis and Forecasting, NYP | KNIME, SAS Viya, SAS Visual Analytics/Visual Statistics

• Cleaned and transformed ~4,800 exercise records in KNIME, including duplicate handling and categorical encoding.
• Built Linear Regression, Decision Tree and Random Forest predictive models in SAS Viya using a 70/30 train-validation split.
• Compared model performance using ASE and R^2; final Linear Regression achieved R^2 = 0.98 with 4 significant predictors.
• Presented findings and translated results into recommendations.

Data Wrangling and Analysis

Data Wrangling, NYP | KNIME

• Merged and cleaned customer datasets, corrected invalid values and data types, and performed transformations.
• Applied data anonymisation techniques and created charts analysing customer spending, income categories and purchase frequency

Nirvana Mobile UX Transformation

Figma, UI/UX Design

• Conducted user journey mapping, prioritised features using MoSCoW, designed an interactive Figma mobile prototype and applied user-centred design principles.

WORK EXPERIENCE

DigitalMarketing & Content Assistant — Farah Boutiques

• Managed social media content by creating, editing and posting promotional videos, product content
and marketing materials.
• Planned and wrote my own script for a marketing video, presented it myself and independently
edited it before publishing.
• Created marketing content that reached a large audience and helped attract new customers; regularly posted videos and promotional content to increase online reach and engagement.
• Created promotional visuals, digital marketing materials and captions for new arrivals, products
and promotions using Canva and Adobe Photoshop.

HACKATHON / LEADERSHIP & ACTIVITIES

NYP x AWS Hackathon — Participant

• Collaborated in a team to develop and present a solution within a time-constrained challenge.

•SIT Club — Subcommittee Member.
•Photography Club — Member.
